CJS “ Holding Trust “Pinskdev” can offer you fuel pellets:

Pellets is manufactured by means of pressing fine-cut wood (woodchip, sawdust, wood flakes) under high pressure without using any additives and glue. We using lignin as a glue. This material is plasticised in process of granulation under high temperature. That’s why pellets is eco-friendly product with low humidity (pellets contain no more 12% humidity instead of 30-50% humidity which contains simple chore) and higher solidity (pellets is time and a half more consistent than simple chore). Pellets looks like small cylinders diameter 6-8 mm and lengthy under 50 mm.

According to handled in certified laboratories researches pellets in there attribute characteristic (percentage of ash and energy value) are absolutely correspond to the European standard DIN 51731.

Pellets are made according to technical conditions 100135477.480-2007 “fuel pellets”. They have the following characteristics:

Parameters	unit of measurement	technical conditions	DIN 51731
diameter	Mm	8	4-10
lengthy	Mm	<50	<50
Consistent	Kg/dm	>1,0-1-4	>1,0-1,4
humidity	%	<12	<12
bulk weight	Kg/m3	640	65
percentage of ash	%	0,55-0,80	<1,5
energy value	Mj	17,83	17,5-19,19,5
sulfur content	%	0,03	<0,08
shelf life	months	6	
Package	Big-bag	1150x1150x1250	

Price FCA Pinsk: 96 Eur/ton without packing, 101 Eur/ton - in big-bag (packing).

We are open for negotiations!
